

MES SERIES

Mobile Home and Residential Pedestals

Pedestal Type – Underground Installation. Provides metered electrical services suitable for use as residential and mobile home service equipment.

FEATURES & SPECIFICATIONS

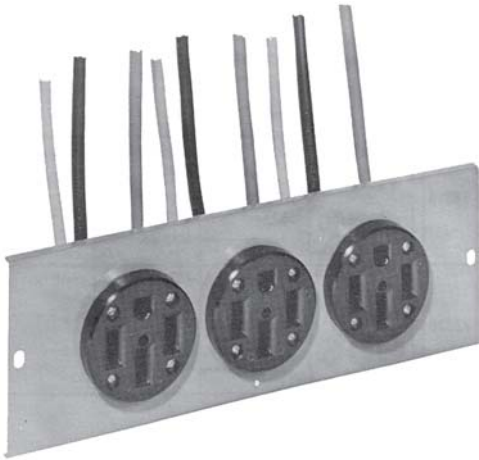

- Circuit breaker interior has provisions for twelve full one-inch poles (including main).
- Rating: 200 Amp, 120/240 VAC.
- Interiors will accept plug-in breakers. (GE, Cutler-Hammer, ITE, Crouse-Hinds/Murray.)
- Suitable for use as service equipment and mobile home service equipment.
- Direct feed kits allow load connections from front or rear. For direct feed use Myers direct feed kit, MES-DFK-F (front) or MES-DFK-R (rear). NOTE: Direct feed kits are not included—must be ordered separately.
- Twin 350 MCM line terminals (installed) provide optional loop-feed installation.
- Compression terminal provisions available, add suffix "PPL" to Catalog No. and consult factory for stud termination.
- 14 gauge corrosion resistant steel construction.
- Raintight enclosure.
- One-piece pedestal type unit.
- 2, 1 1/4 and 1/2 cap-offs provided in rear of pedestal for direct feed.
- Padlock provision.
- Total unit height is 77". Burial depth is 24". Installed height from ground is 48" to meter center or 53" to top of unit.
- Standard color: foliage green powder coat finish.
- Euserc compliant.
